High Poverty/ High Minority Report: 2017-18

In an effort to evaluate equitable access to effective educators, the Department developed the Workforce Stability Index (WSI) and uses the WSI across the state, specifically in High Poverty and High Minority schools and districts. Using a High Poverty/High Minority Report, the Department will annually provide an update on educator equity gaps. The report will provide information on all schools designated as high poverty and/or high minority and their WSI rating. Aligning with the goals of the state's Equitable Access to Effective Educators Plan, the HP/ HM report will assist school districts in identifying any inequities in ensuring that all students have equitable access to effective teachers.

The relative stability of an educator workforce can be estimated by examining factors determined to be relevant to educator quality. The report will inform all stakeholders of the ADE's progress toward the goal of ensuring access to excellent educators. The Division of Educator Effectiveness will provide technical assistance to school districts, in order to guide the development of short-term and long-term implementation goals and improvement plans that will address the equity gaps.

Beginning with the 2017-2018 school year, WSI is based on teachers' inexperience, teaching out-of-field, effectiveness and attrition, and is calculated at the school and district level. The factors are averaged, and then subtracted from a standard of "100".

The formula for WSI is:

$$100 - ((\% \text{ Inexperience}) + (\% \text{ Out-of-Field}) + (\% \text{ Ineffective}) + (\% \text{ Attrition}) / 4).$$

High Poverty schools by definition are those schools in the top 25% when all schools are ranked by % of students reported as eligible for the national free and reduced-price lunch program.

High Minority schools by definition are those schools in the top 25% when all schools are ranked by % of students reported as non-white.

Average scores for each of the WSI factors in each of the identified populations (2017-2018 school year) are evident in Figures below.

The following tables (Table 1 and Table 2) represent the data found in all High Poverty schools and all High Minority schools:

Table 1. (DATA) HIGH POVERTY SCHOOLS
